

Patent Claims

1. Heat exchanger, in particular heat exchanger for a refrigerator unit, having a plurality of fins which are arranged essentially parallel to one another, characterized in that at least some of the fins (2) are designed to be not smooth (2a) in part and smooth (2b) in part.
2. Heat exchanger according to Claim 1, characterized in that those regions of the fins (2a) which are not smooth are provided in the entry region (E) of the heat exchanger (1).
3. Heat exchanger according to Claim 1 or 2, characterized in that those regions of the fins (2a) which are not smooth are designed to be corrugated.
4. Refrigerator unit with at least one heat exchanger, characterized in that the heat exchanger or at least one of the heat exchangers is designed as a heat exchanger (1) according to one of Claims 1 to 3.
